

JESUS A. JIMENEZ

DEVELOPER FRONTEND,
DEVELOPER WORDPRESS
MOBILE DEVELOPER SWIFT UI
AND REACT NATIVE

ABOUT ME

I am Jesús Jiménez, a Full Stack Developer with backend experience in Node.js and mobile development using React Native and iOS with Swift UI and UI Kit. At 35 years old, my focus is on creating high-quality mobile applications.

Technical Skills:

- **Mobile Development:** iOS, Swift UI, UI Kit
- **Hybrid Development:** React Native
- **Full Stack Development**

Soft Skills:

- **Teamwork**
- **Leadership**
- **Assertive Communication**
- **Analytical Skills and Problem Solving**
- **Constant Desire for Learning and Staying Ahead**
- **Adaptability, Ability to Prioritize and Manage Multiple Tasks**
- **Ethics, Commitment, Honesty, and Integrity**

- Dirección: Mexico, CDMX.

EDUCATION

DEV.F

Master en Coding

Master of 1 year, receiving professional training, becoming a full stack developer.

Master in IOS Swift

Course of 68hrs for mobile development with Swift UI and UI KIT

WORK EXPERIENCE

Developer Front-End

<https://www.elfcosmetics.com/>

Position: Front-End Developer

Dates: October 2014 to September 2016

Company: elf cosmetics

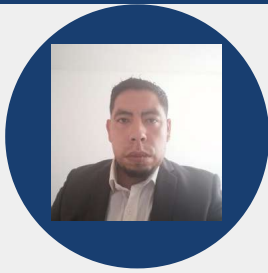

I developed and optimized code for elf cosmetics, an e-commerce website, both on the front-end using React and Bootstrap 5, and on the back-end with Node.js using the Express framework.

Developer Full Stack

<https://taggiecards.com/>

Dates: November 2016 to October 2018

- At Taggiecards, I worked as a Full Stack Developer on a WordPress-based platform, where I was responsible for building custom themes and plugins tailored to business requirements. All development followed modern WordPress standards, leveraging Gutenberg block architecture, including the creation of both static and dynamic blocks to deliver flexible and reusable content components.
- On the frontend, I worked with React.js, integrating it seamlessly within WordPress to enhance interactivity and performance. On the backend, I used PHP and MySQL to develop custom functionalities, optimize database interactions, and ensure scalable and maintainable code.
- I also contributed to the infrastructure setup and maintenance, configuring Nginx servers running inside Docker containers, which improved environment consistency, deployment workflows, and overall system reliability.
- In parallel, I collaborated on the development of mobile applications using React Native, actively participating across most stages of the application lifecycle—from development and integration to testing and deployment. I worked with a wide range of Android and iOS native components and APIs, including BackHandler, DrawerLayoutAndroid, PermissionsAndroid, and others, enabling deep native functionality and improved user experience across platforms.
- Throughout the role, I collaborated closely with designers, product stakeholders, and other developers to deliver high-quality web and mobile solutions aligned with business goals.

WORK EXPERIENCE

Developer FrontEnd

Nova Solutions

Position: Developer FrontEnd

Dates: January 2019 to January 2021.

Company: Invex Bank

At Nova Solutions, I was assigned to INVEX Bank, where we developed an investment platform from scratch, successfully taking the application from initial concept to production.

I led the frontend development, solving the complexity of global and shared state by designing a clean and scalable state management architecture using Zustand. This approach ensured predictable data flows, improved maintainability, and allowed the application to scale as new investment features were added.

I was responsible for connecting the frontend with a backend developed in Java, using TanStack Query to manage API communication, caching, error handling, and asynchronous data flows, resulting in a robust and efficient integration between systems.

The application followed a microfrontend architecture, leveraging Modyo to develop and deploy independent frontend widgets. This modular approach enabled faster development cycles, easier maintenance, and independent releases across different parts of the platform.

For UI implementation, I used Tailwind CSS and Vercel's component library to deliver a responsive, accessible, and consistent user experience that met banking-grade standards. I also implemented unit tests with Jest to ensure code quality and application stability.

Development was carried out under an Agile Scrum methodology, actively participating in sprint planning, daily stand-ups, refinements, and retrospectives. Jira was used to manage user stories, tasks, and sprint progress, ensuring clear communication, traceability, and timely delivery.

I collaborated closely with backend engineers, designers, QA, and product stakeholders to deliver a secure, scalable, and production-ready investment system.

WORK EXPERIENCE

Developer Full Stack

Grupo Carso

Position: Developer Full Stack Sr
Dates: February 2021 to January 2024.
Company: Grupo Carso

As a Full Stack Developer at Grupo Carso, I was responsible for designing, developing, and maintaining high-performance enterprise solutions across backend, frontend, and mobile environments. My role covered the entire software development lifecycle, including architecture design, implementation, testing, deployment, and continuous optimization.

Additionally, I was in charge of the technology operations and development tasks for two key corporate accounts: UnoTV and Claro Sports, ensuring system reliability, feature delivery, and platform performance.

Key Responsibilities

- **Backend Development (Node.js / NestJS):**
 - Designed and implemented scalable services and microservices using NestJS, applying clean architecture principles and design patterns.
 - Developed secure REST and GraphQL APIs with proper documentation and high availability.
 - Integrated external services, authentication flows (JWT), background processing, and data pipelines.
- **Database Management (PostgreSQL, MySQL, MongoDB):**
 - Modeled relational and non-relational databases for high-concurrency systems.
 - Optimized queries, indexes, and general database performance.
 - Implemented migrations, stored procedures, triggers, and data integrity rules.
- **Frontend Development (Angular & React):**
 - Built responsive and modular interfaces using Angular and React.
 - Developed Single Page Applications (SPAs) and internal dashboards with state management (NgRx / Redux).
 - Implemented advanced routing, lazy loading, API consumption, and reusable UI components.
- **Mobile Development (SwiftUI – iOS Native):**
 - Developed native iOS applications using SwiftUI, integrating authentication, internal APIs, and push notifications.
 - Built modular views, animations, and optimized layouts for multiple Apple devices.
- **DevOps & Deployment:**
 - Managed CI/CD pipelines, automated testing, and Git-based workflows.
 - Deployed applications across cloud and on-premise environments, ensuring monitoring and reliability.
- **Account Management (UnoTV & Claro Sports):**
 - Oversaw development, maintenance, and feature implementation for major media platforms.
 - Ensured uptime, performance, and delivery of new functionalities aligned with business needs.
 - Coordinated with product, editorial, and infrastructure teams to support high-traffic events and content releases.

Key Achievements

- Delivered critical systems used daily by thousands of internal and external users.
- Improved backend performance and reduced processing times through code and query optimization.
- Implemented full end-to-end features across backend, frontend, and mobile environments.
- Ensured the stability and performance of UnoTV and Claro Sports platforms during high-demand periods.

WORK EXPERIENCE

Developer Mobile React Native Sr.

Capgemini

Position: Developer Mobile React Native Sr

Dates: March 2024 to March 2026.

Company: Capgemini

Key Activities at Capgemini:

- Architected & Typed Mobile Solutions
- • Designed and implemented scalable React Native app architectures using TypeScript, defining strict interfaces and typings for all screens, services, and data models.
- High-Performance Local Storage
- • Integrated MMKV for encrypted, in-memory key-value storage, caching authentication tokens, user preferences, and offline data to ensure instant load times and seamless UX.
- API Development & Integration
- Defined, consumed, and maintained RESTful and GraphQL endpoints; built centralized network services with Axios interceptors for authentication, error handling, and request retry logic.
- Authentication & Session Flows
- Implemented secure login, logout, and token-refresh mechanisms; persisted credentials in MMKV and orchestrated background token renewal to maintain uninterrupted user sessions.
- Screen Navigation & Deep Linking
- Configured complex navigation hierarchies (stack, tab, and drawer navigators) with React Navigation; enabled deep-linking support for marketing campaigns and push notifications.
- Reusable Component Library
- Developed a suite of modular UI components (Buttons, Forms, Cards, Lists) with a shared design system, ensuring consistency in spacing, typography, and theming across Android and iOS.
- State Management with Zustand
- Architected global and feature-specific state slices using Zustand; optimized selectors and middleware for performant updates and integrated Redux DevTools for debugging.
- Native Bridge & Module Creation
- Built a custom Android bridge to expose functionality from a proprietary .aar library to JavaScript; authored iOS native modules in Objective-C and Swift, handling CocoaPods setup and build configurations.
- CI/CD & Azure Deployments
- Established end-to-end pipelines in Azure DevOps for automated linting, testing, and multi-platform builds; managed distribution via App Center, TestFlight, and Google Play Console.
- Automated Testing & Code Quality
- Wrote comprehensive unit and integration tests using Jest and React Native Testing Library; enforced style and static analysis with ESLint, Prettier, and Husky pre-commit hooks.
- Partnered with UX designers, backend engineers, and QA teams to translate requirements into deliverable features; conducted peer code reviews and mentored junior developers on best practices.
